SYSTEM ARCHITECTURE & PRODUCT DOCUMENTATION

OneSash Technocrafts

Official Website Documentation, UI Interface Specifications, Interactive Engine Catalog & Modernization Blueprint.

CLIENT / ENTITY

OneSash Technocrafts (Chennai, India)

PRIMARY FRAMEWORK

React 19 + TypeScript + Vite 8

STYLING & 3D LAYER

Tailwind CSS v4 + Three.js + Framer Motion

DOCUMENTATION VERSION

Release 2.0 (Full Technical Audit & UI Capture)

DOCUMENT DATE

October 2026

STATUS & SCOPE

Active Production Website & Modernization Guide

CONFIDENTIAL & PROPRIETARY — ONESASH

AUTOMATED HIGH-RESOLUTION REPORT

1. Executive Summary & Tech Architecture

OneSash (also referred to as *onesash Technocrafts*) is a high-performance digital product and software engineering web application. Engineered on top of modern frontend and graphics paradigms, the web platform serves as the central digital touchpoint for prospective enterprise clients, startup founders, and technical partners seeking custom web engineering, AI integrations, mobile application development, and cloud systems.

1.1 Core Technology Stack

Layer	Technology	Purpose & Technical Justification
Core Library	React 19.2.7	Concurrent rendering, server component readiness, clean component abstractions.
Type System	TypeScript 6.0+	Strict end-to-end typing across models, section props, and API payloads.
Build Engine	Vite 8.1 / 8.3 + HMR	Sub-second module bundling, code splitting, and zero-latency development.
Styling Architecture	Tailwind CSS v4.3	Utility-first zero-runtime CSS with modern CSS-native theme variables.
3D Graphics	Three.js 0.185 + R3F + Drei	GPU-accelerated interactive 3D hero canvas, rotating wireframe globe, and visual tech metaphors.
Motion & Transitions	Framer Motion 12.4	Spring physics, view-triggered entrance animations, and card tilt interactions.
Kinetic Scrolling	Lenis Smooth Scroll 1.3	Subtle inertia momentum scrolling for a high-end luxury editorial experience.
SEO & Meta Architecture	React Helmet Async	JSON-LD schema markup, OpenGraph tagging, and dynamic titles per route.

1.2 High-Level Architecture Diagram

Frontend App Hierarchy:

```
Index.html
└── main.tsx
    └── App.tsx
        ├── HelmetProvider (SEO & Schema Meta)
        ├── ThemeProvider (Dark/Light Palette Engine)
        ├── SmoothScrollProvider (Lenis Momentum)
        └── BrowserRouter (React Router DOM v7)
            ├── Global Overlays (CustomCursor, ProgressBar, CommandPalette, CookieBanner)
            └── MainLayout (Sticky Navbar, Main Viewport, Dynamic Footer)
                └── [Lazy-Loaded Route Components]
```

2. Information Architecture & Route Directory

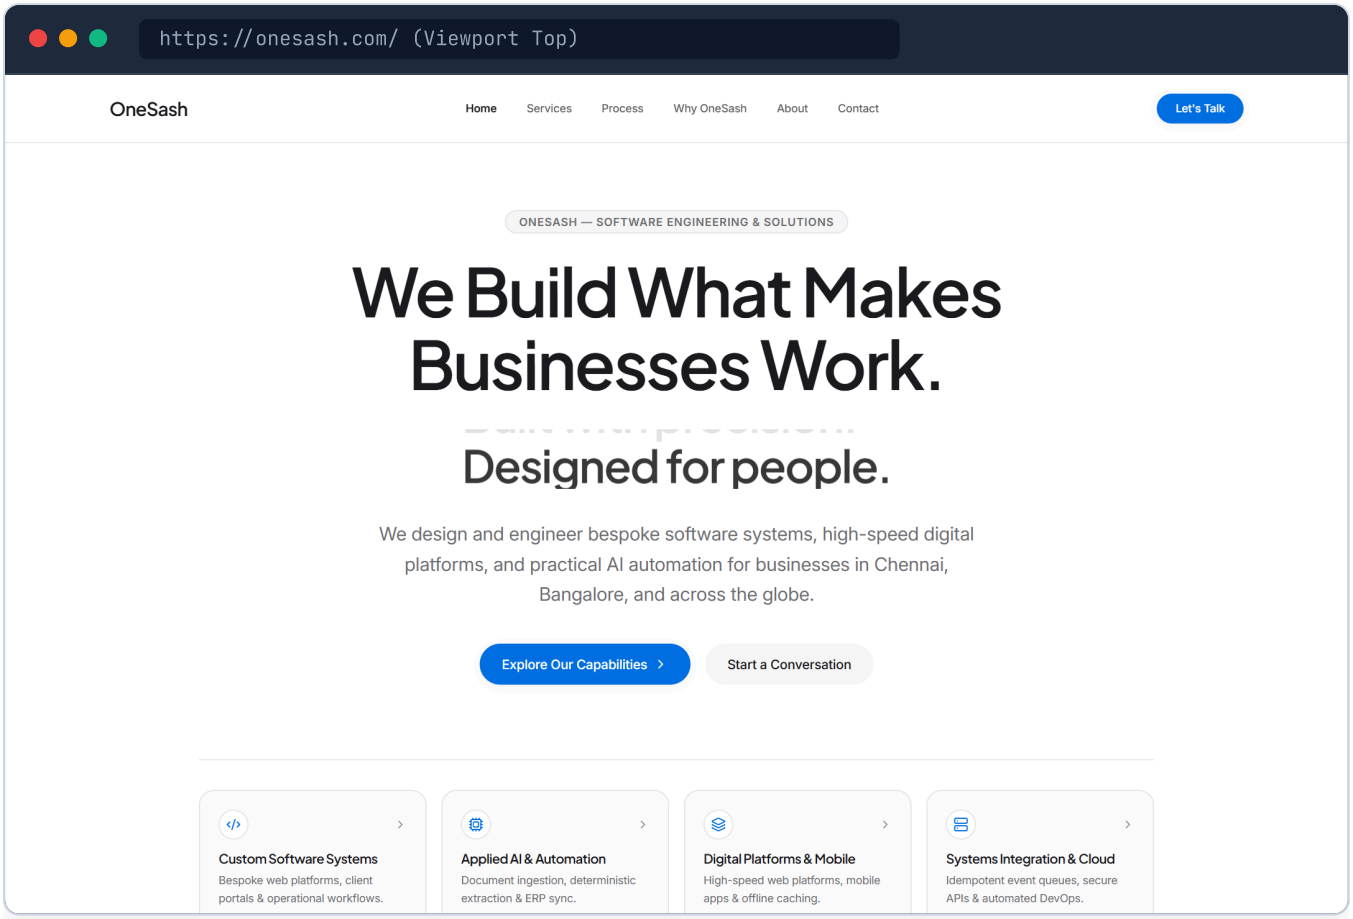

The OneSash web application is engineered with lazy-loaded code-splitting for all pages, minimizing initial bundle download size while providing snappy client-side navigation.

Route Path	Page Component	Primary Objective & User Flow
/	HomePage.tsx	High-impact hero, proof of expertise, service overview, selected work, engineering team, philosophy, and primary conversion triggers.
/about	AboutPage.tsx	Founding story, engineering principles, leadership profiles, 3D interactive globe, and team pedigree.
/services	ServicesPage.tsx	Comprehensive overview of the 6 engineering disciplines, delivery process, and technical SLAs.
/services/web-development	WebDevPage.tsx	Detailed breakdown of full-stack web platforms, multi-tenant portals, SaaS architecture, and tech stacks.
/services/ai-integration	AIPage.tsx	Deep-dive into LLM workflows, RAG pipelines, model fine-tuning, and automated cognitive agents.
/services/mobile-apps	MobileAppPage.tsx	Native & cross-platform iOS/Android development (React Native, Flutter) specifications.
/services/cloud-solutions	CloudPage.tsx	AWS / GCP cloud infrastructure, Docker, Kubernetes containerization, and automated CI/CD pipelines.
/portfolio	PortfolioPage.tsx	Case studies showcase with industry filters, tech badges, and deployed product demonstrations.
/case-studies	CaseStudiesPage.tsx	In-depth enterprise case studies (MediTrack Pro, UrbanRide, InsightAI) with metrics and architecture breakdown.
/calculator	CalculatorPage.tsx	Interactive software development cost & timeline estimator with scope configuration tools.
/booking	BookingPage.tsx	Technical consultation discovery scheduler with requirements pre-qualification form.
/careers	CareersPage.tsx	Talent acquisition portal featuring engineering openings, internships, and culture benefits.
/contact	ContactPage.tsx	Multi-channel inquiry portal (interactive form, direct telephone, email, WhatsApp, and RFP requests).

3. UI Walkthrough: Homepage (Root Route)

3.1 Hero Section & Interactive 3D Canvas

The landing view introduces the visitor to OneSash with an assertive, modern layout. The left column presents the value proposition, live availability badge, and primary calls-to-action. The right column renders a GPU-accelerated interactive 3D canvas that responds to cursor rotation and ambient light.

Key Interactive Elements

- **Status Indicator:** Pulse green badge displaying studio operational readiness.
- **Primary CTA:** "View Our Work" button smoothly auto-scrolling to project showcases.
- **Secondary CTA:** "Start a Project" navigating directly to high-intent inquiry portal.

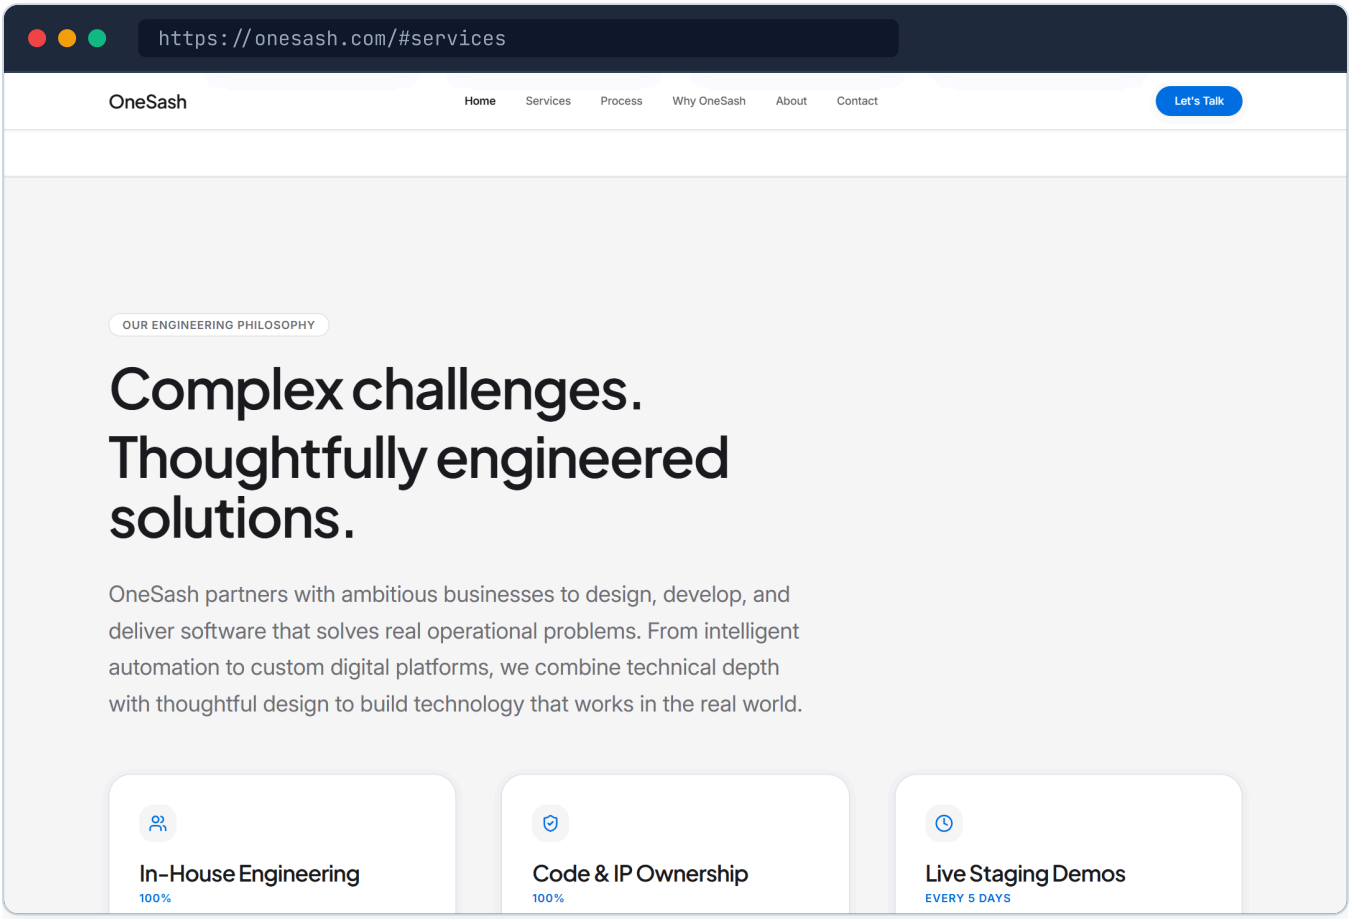

Visual Hierarchy Analysis

- **Typography:** Serif headline with ultra-bold weight contrasting with mono badges.
- **3D Canvas:** Real-time wireframe torus mesh rendered with Three.js / R3F.
- **Aesthetic:** Strict editorial minimalist palette honoring high-contrast luxury tech design.

4. UI Walkthrough: Core Capabilities & Work

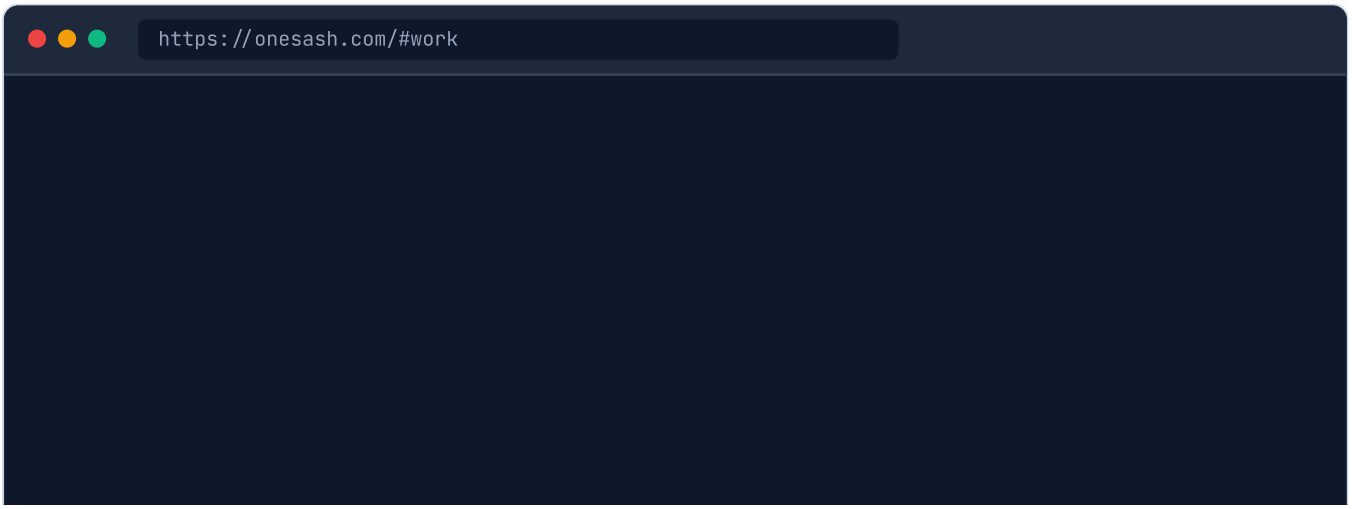

4.1 Disciplines & Services Catalog

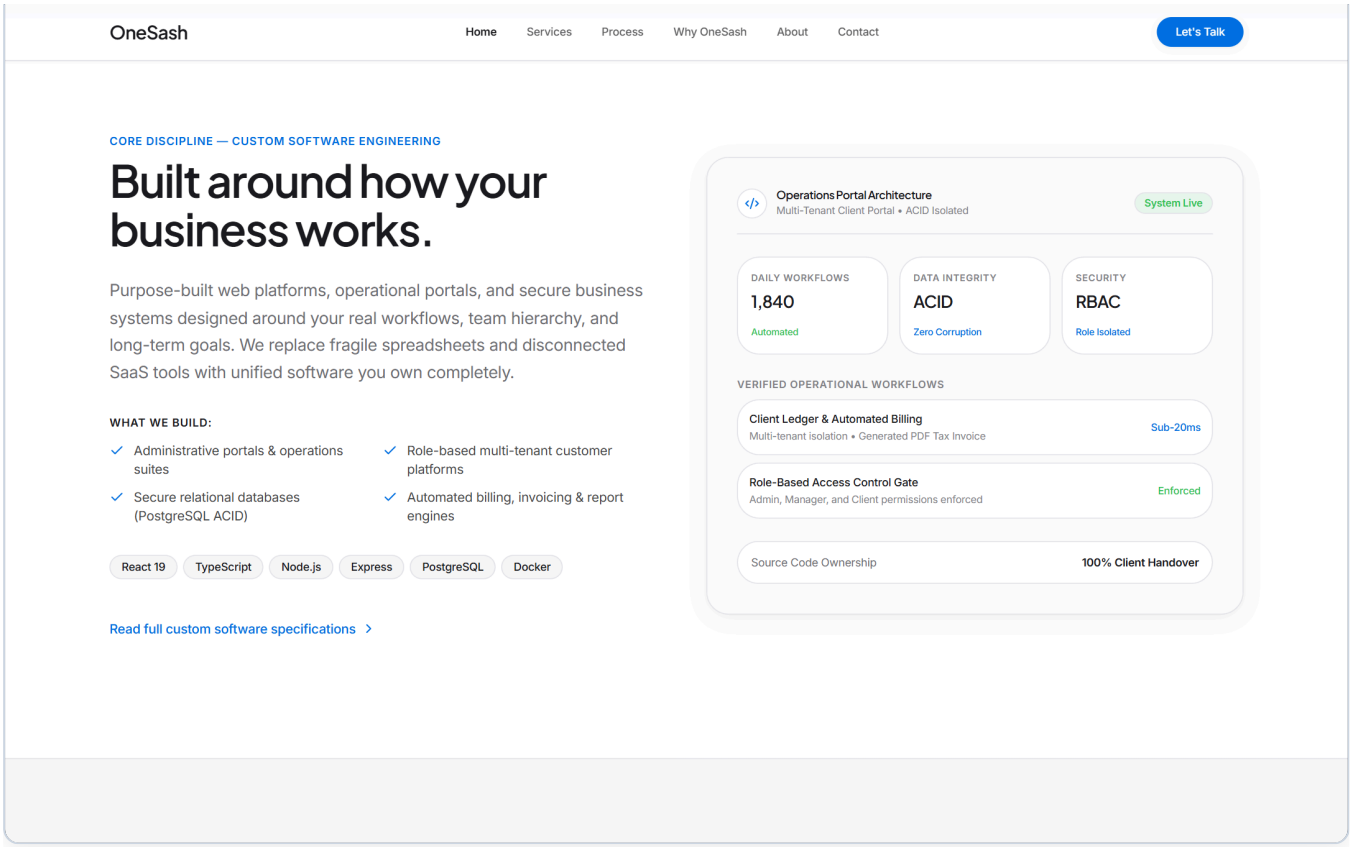

The service section breaks down technical disciplines into structured catalog items with numbered codes, deliverables list, tech stack badges, and referenced case studies.

4.2 Selected Work & Architectural Showcase

Featuring custom-built platforms such as *APAR CROWN* (Facility Management), *THE LAW* (Legal CRM), and Enterprise Workflow Portals.

CORE DISCIPLINE — CUSTOM SOFTWARE ENGINEERING
Built around how your business works.
Purpose-built web platforms, operational portals, and secure business systems designed around your real workflows, team hierarchy, and long-term goals. We replace fragile spreadsheets and disconnected SaaS tools with unified software you own completely.
WHAT WE BUILD:
Administrative portals & operations suites
Role-based multi-tenant customer platforms
Secure relational databases (PostgreSQL ACID)
Automated billing, invoicing & report engines
React 19
TypeScript
Node.js
Express
PostgreSQL
Docker
Read full custom software specifications
Operations Portal Architecture
Multi-Tenant Client Portal • ACID Isolated
System Live
DAILY WORKFLOWS
1,840
Automated
DATA INTEGRITY
ACID
Zero Corruption
SECURITY
RBAC
Role Isolated
VERIFIED OPERATIONAL WORKFLOWS
Client Ledger & Automated Billing
Multi-tenant isolation • Generated PDF Tax Invoice
Sub-20ms
Role-Based Access Control Gate
Admin, Manager, and Client permissions enforced
Enforced
Source Code Ownership
100% Client Handover

5. UI Walkthrough: Engineering Leadership & About

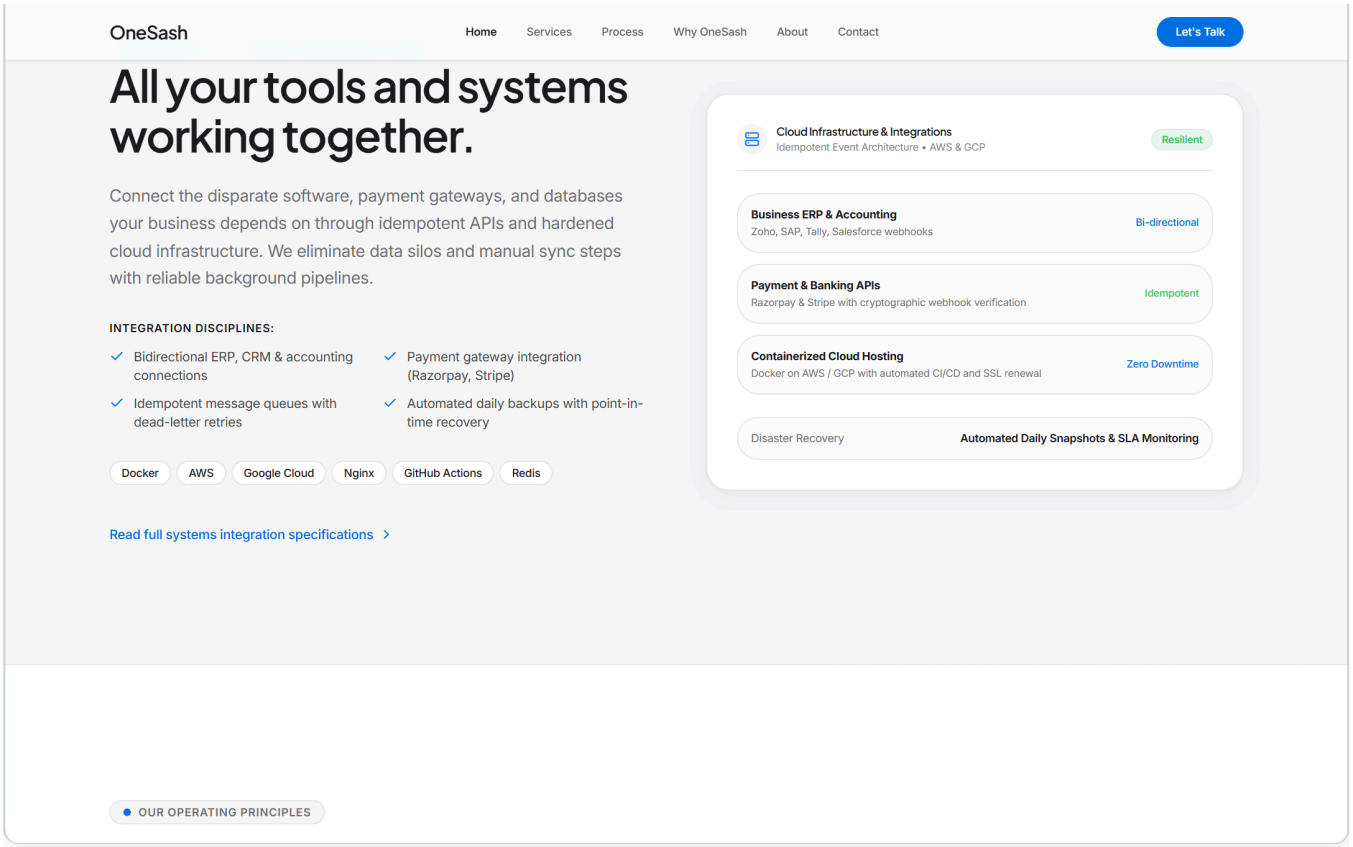

5.1 Founding Story & Interactive 3D Globe

The About section pairs the founding story with an interactive 3D Globe canvas depicting global reach, complemented by individual 3D tilt cards for leadership team members.

5.2 Team Bios & Technical Specializations

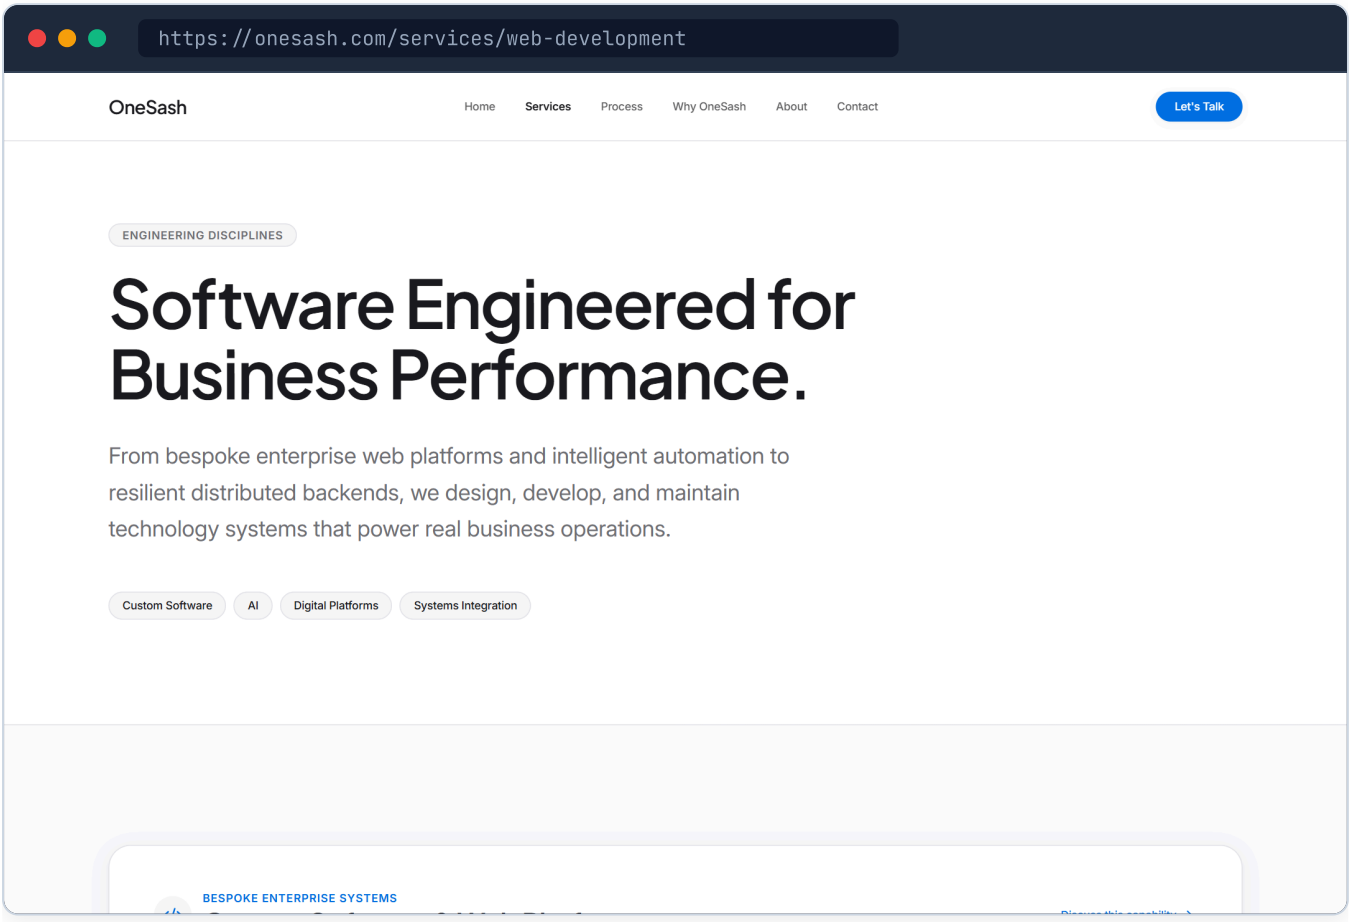

Leadership Profile Summary: Profiles highlight specialized capabilities in Full-Stack Distributed Systems (Saraveshvaran A), Frontend & Interactive UI Engineering (Sharvesh CM), AI & Workflow Logic (Siddharth Santhosh Kumar), Brand & Strategic Growth (Vivek A), and Performance Digital Marketing (Naren Annamalai).

6. UI Walkthrough: Specialized Service Deep-Dives

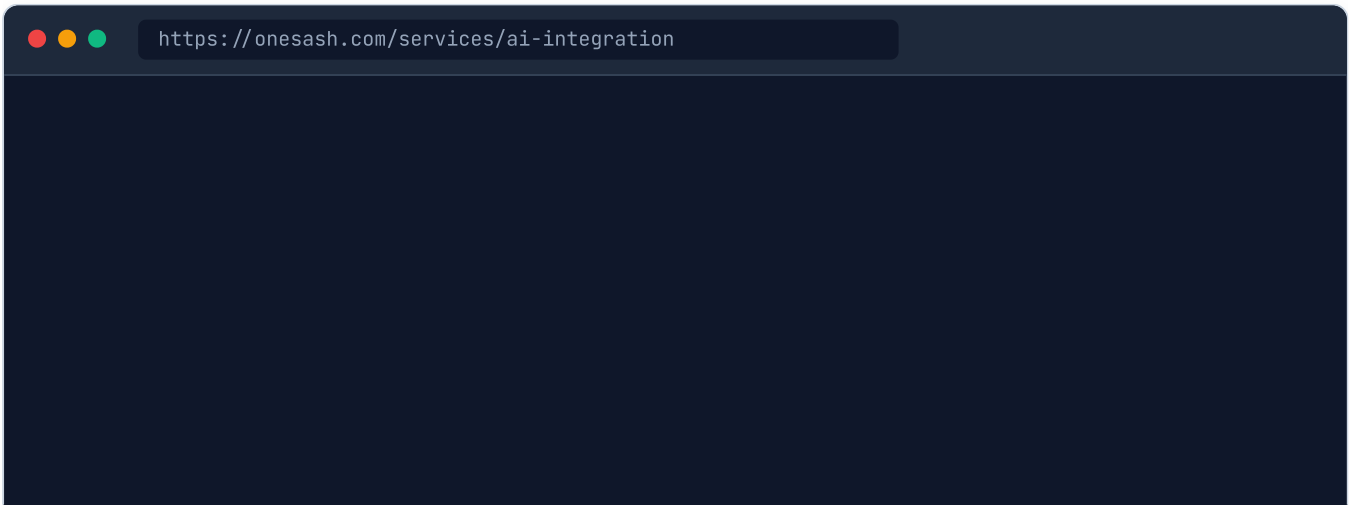

6.1 Full-Stack Web Application Development

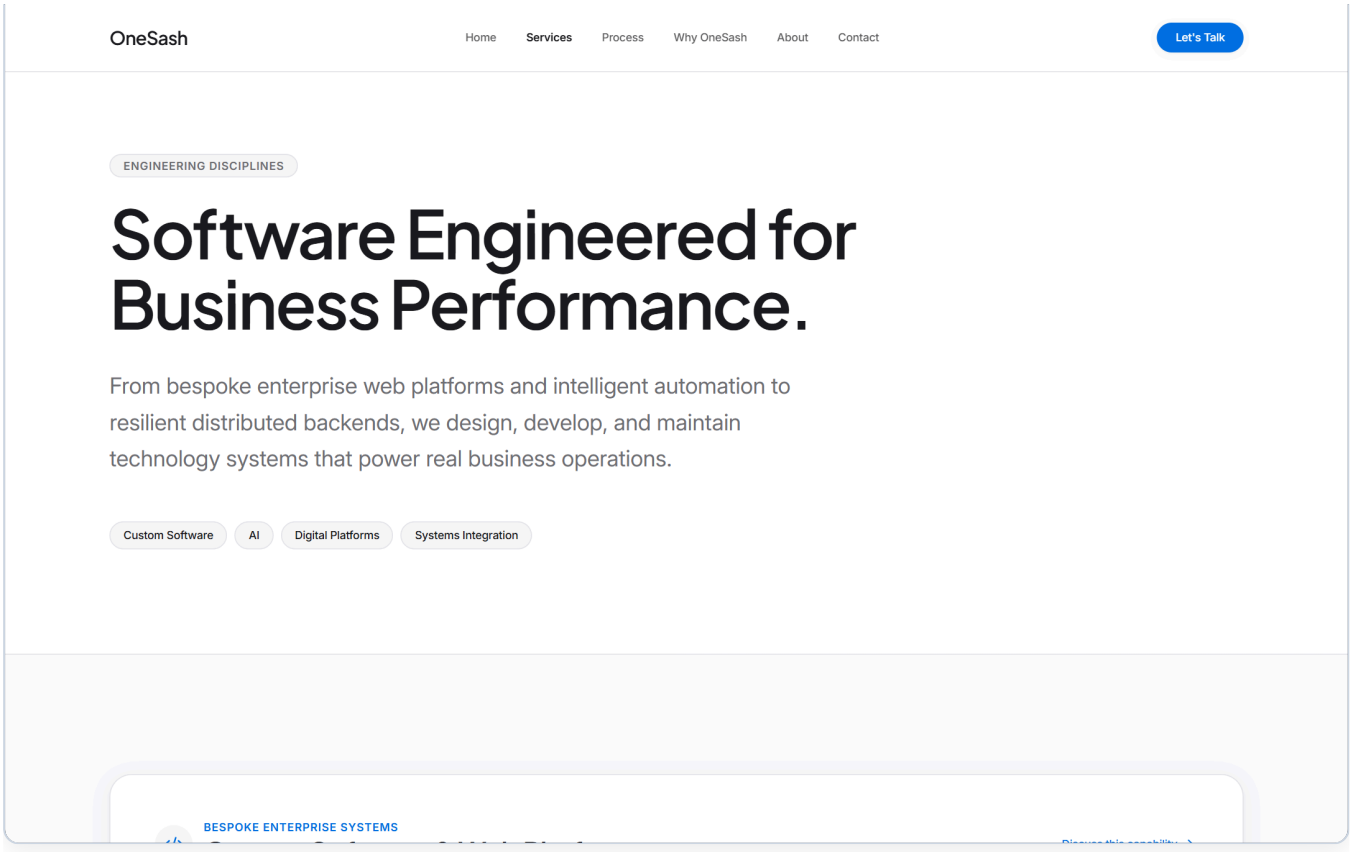

Dedicated landing page detailing frontend architecture, backend RESTful and GraphQL routing, microservices, and database clustering.

6.2 AI Systems & Model Integration

Details on machine learning, LangChain workflows, OpenAI/Gemini API integration, pgvector semantic search, and autonomous business automation.

BESPOKE ENTERPRISE SYSTEMS

7. UI Walkthrough: Case Studies & Interactive Tools

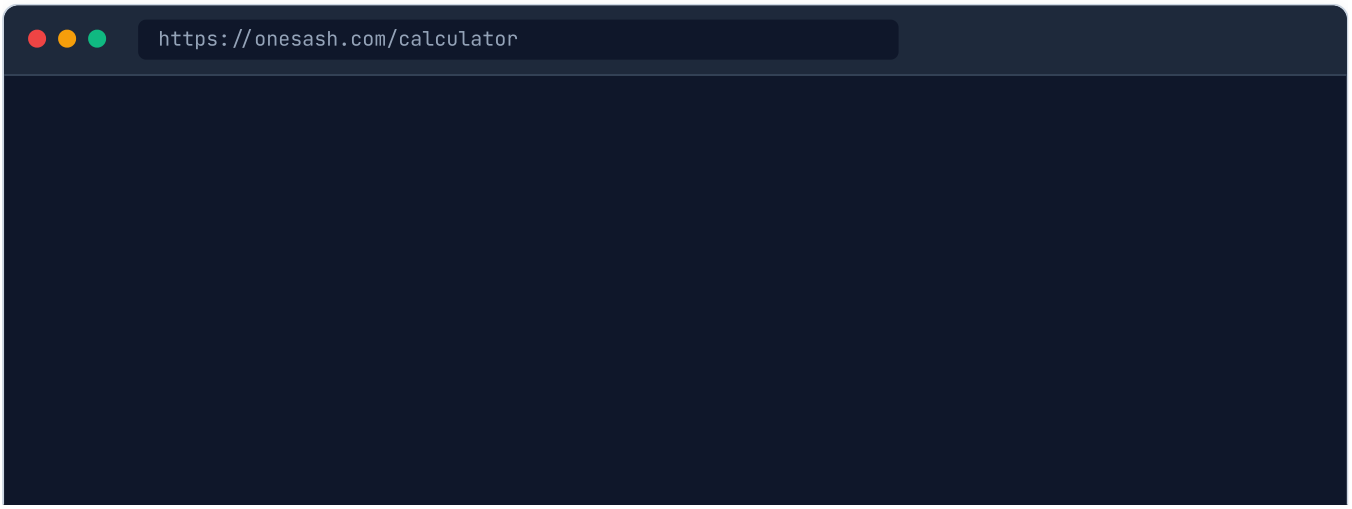

7.1 Enterprise Case Studies & Quantitative Outcomes

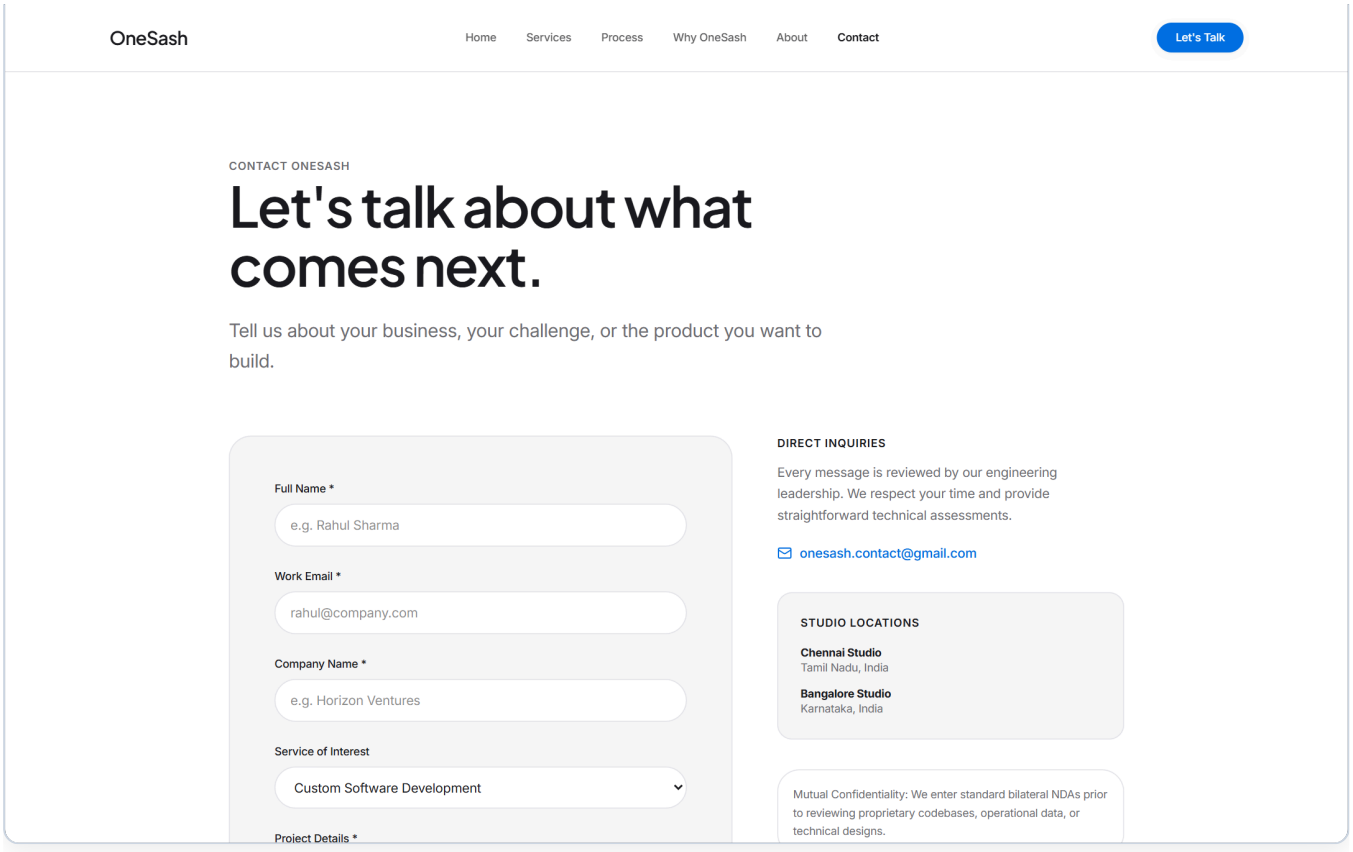

Detailed client case studies illustrating problem, solution, architecture, and verified metrics (e.g. 200+ clinics scaled, 50k downloads in month 1, 80% reporting time saved).

7.2 Interactive Software Cost & Scope Calculator

Self-service scoping tool allowing prospective clients to estimate budgets, timelines, and technical requirements before initial consultation.

Mutual Confidentiality: We enter standard bilateral NDAs prior to reviewing proprietary codebases, operational data, or technical designs.

8. UI Walkthrough: Conversion & Inbound Lead Funnel

8.1 Technical Discovery Booking Scheduler

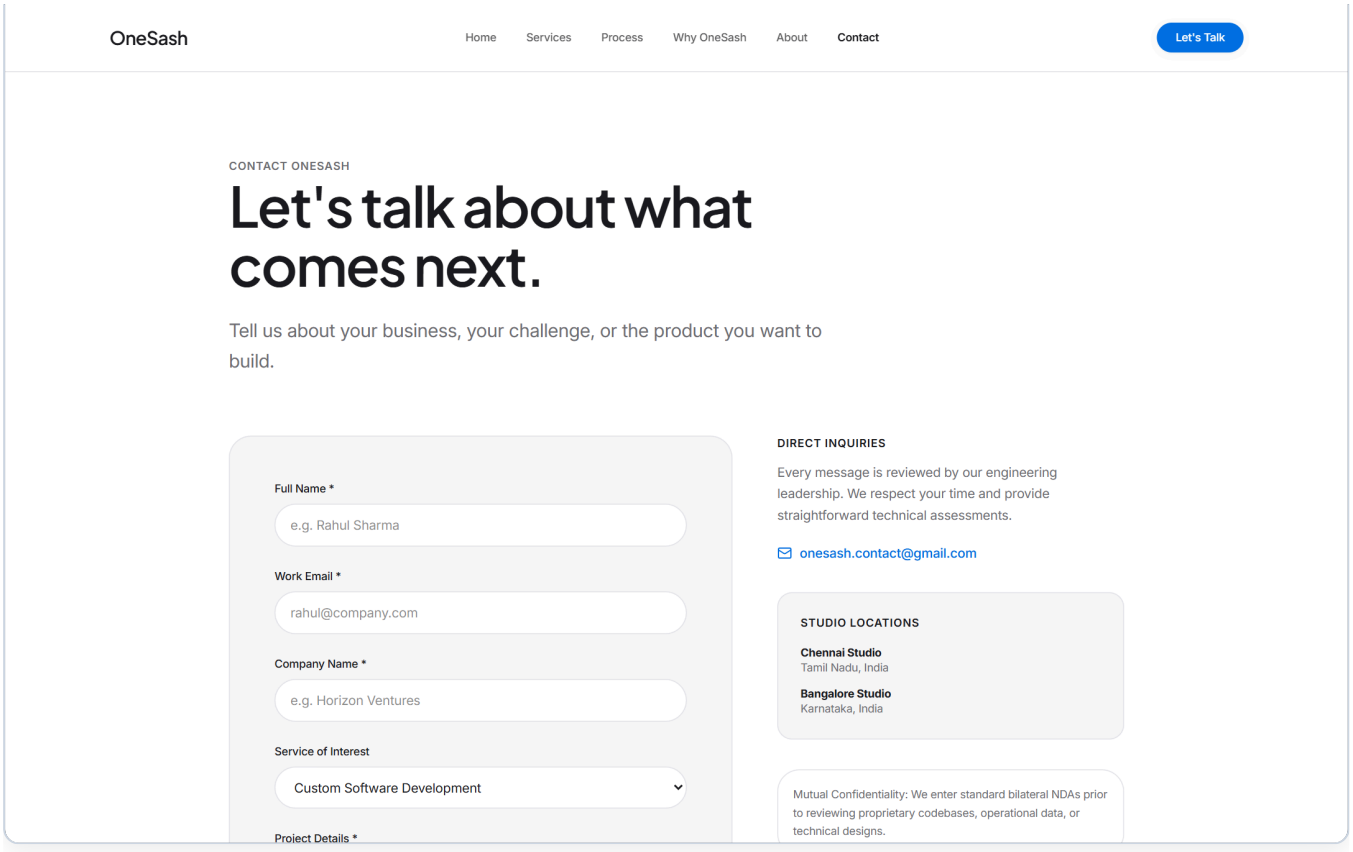

Allows qualified leads to book technical consultations, specify project objectives, and select convenient appointment windows.

8.2 Direct Contact & Project RFP Portal

Comprehensive contact channels with direct executive telephone lines, WhatsApp instant chat, and structured inquiry form.

9. Strategic Modernization: Enterprise Company Blueprint

To scale OneSash into a complete professional software company, execute the following technical and brand transformations:

Phase 1: Brand & Copy Transformation

Eliminate student/freelance references across the platform:

- Update `HeroSection.tsx`: Change tag from "Software Freelancing Studio" to "Enterprise Software Engineering & AI Solutions".
- Update `AboutSection.tsx`: Position the team as seasoned technical partners rather than student founders.
- Update `Footer.tsx`: Change tagline to corporate registration and enterprise standards.

Phase 2: Navigation & Mega-Menu Architecture

Elevate the main navbar from a 4-link menu to a tiered enterprise navigation:

- **Services Dropdown:** Direct links to all 6 specialized discipline pages.
- **Industries:** Healthcare, FinTech, PropTech, LegalTech.
- **Case Studies:** Dedicated primary link with client ROI metrics.
- **RFP Button:** Dedicated "Request a Proposal" button.

Phase 3: B2B Enterprise Risk-Mitigation Seals

Integrate institutional trust markers:

- **Security Badges:** SOC 2 Type II readiness, HIPAA compliance, GDPR conformity.
- **Guaranteed IP Transfer:** Legal guarantee of 100% intellectual property ownership upon milestone release.
- **Mutual NDA Guarantee:** Automated mutual non-disclosure agreement before scoping.

Phase 4: Sales Funnel & Legal Framework

Establish legal and commercial transparency:

- **Engagement Models:** Dedicated Engineering Pods, Fixed-Price Turnkey SOW, Technical Code Audits.
- **Legal Pages:** Deploy dedicated `/privacy`, `/terms`, and `/security` policy routes.
- **Live Calendar Embed:** Connect Cal.com or Calendly directly into `BookingPage.tsx`.

> **Conclusion:** OneSash possesses an exceptional modern technical foundation (React 19, Vite, Three.js, Tailwind v4). Executing the positioning and navigation upgrades outlined in this documentation will position the firm to win high-ticket B2B software engineering contracts globally.
